

Dear Sir or Madam,

This form will allow you to communicate your comments, complaints, questions to the Investor of the present H2HUB Nowa Sarzyna project in a more efficient way and thus allow for more efficient communication and transfer of information as well as reaction to events/problems arising from our activities.

Once you have completed the form, please feel free to leave it in the contact box at the Town Hall of Nowa Sarzyna or send it to one of the addresses below:

Marta Porzuczek,
Director of Environment and Sustainability
Department
Polenergia SA
ul. Krucza 24/26, 00-526 Warszawa
Telefon: +48 609 909 702
e-mail: marta.porzuczek@polenergia.pl

Jakub Niestryjewski,
Hydrogen Projects Manager
Polenergia SA
ul. Krucza 24/26, 00-526 Warszawa
Telefon: +48 606 431 561
e-mail: jakub.niestryjewski@polenergia.pl

regards,
Jakub Niestryjewski

Notice! To submit a formal comment on the Environmental Impact Report (Raport Oddziaływania na Środowisko), contact the Office of the Town and Municipality of Nowa Sarzyna, according to the mayor's notice dated 12.05.2023, case number RIG 6220.8.2022.

Information disclaimer on the processing of personal data and consent to the processing of personal data

According to Article 13 (1) and (2) of the European Parliament and the Council Regulation (EU) 2016/679 of April 27, 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data and the repeal of Directive 95/46/EC (General Data Protection Regulation) ("RODO"), we inform you that:

The Administrator of your Personal Data is Polenergia S.A. Krucza 24/26, 00-526 Warsaw.

If you have any questions, please contact us at the address of our registered office or directly by e-mail (rodo@polenergia.pl).

Your personal data will be processed pursuant to Article 6(1) of the RODO in order to process your complaint or grievance.

In accordance with the RODO, you have:

- the right to access your data and receive a copy of it;
- the right to rectify (amend) your data;
- the right to erasure of your data, restriction of data processing;
- the right to object to the processing of your data;
- the right to data portability;
- the right to withdraw consent to the processing of data at any time, without affecting the lawfulness of processing carried out on the basis of consent before its withdrawal, if the processing of data is based on the consent of the data subject or on the basis of Article 9(2)(a) of the RODO;
- The right to lodge a complaint with the supervisory authority (President of the Office for Personal Data Protection).
- Your provision of personal data and the following consent to their processing is voluntary.

By entering your personal data in the form, you consent to the processing of your personal data by Polenergia S.A. with its registered office: Krucza 24/26, 00-526 Warsaw in the scope of name, surname, telephone number and e-mail address for the needs of Polenergia H2HUB Nowa Sarzyna sp. z o.o in the scope of the mechanism for reporting complaints and grievances.

Date of Incident/Grievance	
	<input type="radio"/> One time incident - date <input type="radio"/> Happened more than once – how many times <input type="radio"/> On-going (currently existing problem)
Proposed solutions:	

The H2HUB in Nowa Sarzyna is a pilot project for the production of green hydrogen entirely from renewable energy.

In view of the environmental policy goals of the European Union and the price of fossil fuels becoming more expensive as a result of the war in Ukraine, the introduction of green hydrogen to the market is desirable. It will make it possible to replace partially, and eventually entirely, natural gas in the electricity and thermal power industries, store energy obtained from RES, fuel transport and produce green components for chemical and industrial processes (such as ammonia).

In addition to the hydrogen generation and storage unit, H2 Hub Nowa Sarzyna will be equipped with a filling station for battery trucks and buses. This solution will enable the development of green mobility in the region by promoting green public transport and the possibility of transporting hydrogen to mobile refuelling stations. The hydrogen produced will also supply nearby chemical plants, and is planned to be used in the co-firing process at ENS to reduce emissions and the need for natural gas, and to be injected into the Gaz-System gas network to enable its easy off-take by other consumers.

Commissioning of the hydrogen plant is planned for the fourth quarter of 2024. The installation will be capable of producing up to 90kg H₂/hr.
